

Homework 1, 2, and 3

Integrity: Your honor is extremely important. This academic security policy is designed to help you succeed in meeting academic requirements while practicing the honorable behavior our country rightfully demands of its military. Do not compromise your integrity by violating academic security or by taking unfair advantage of your classmates.

Authorized Resources: You can **ONLY** seek help from the instructor. Homework is an individual exercise.

Homework 1 Linux Command Line

Go to www.codecademy.com and create an account. Sign up for *Learn the Command Line*. Only do the free lessons, not the Pro lessons which require you to pay. Do lessons 1-2 and print out your dashboard showing completion and turn it in. You should have *something* that looks like this for your dashboard, but for the command line training:

Note: these homeworks are all or nothing. If you turn in the dashboard, then you get full credit. If you don't, then you get nothing. These are easy, they just take time to go through them.

Homework 2 Python I

Go to www.codecademy.com and sign up for *Learn Python*. Do lessons 1-3 and print out the dashboard showing completion and turn it in.

Homework 3 Python II

Continue on in *Learn Python* and do lessons 4-5. Print out the dashboard showing completion and turn it in.
